WHY LEASE?

Leasing allows you to pay for equipment, computers, software or executive automobiles without tying up your capital or using your lines of credit.

When you lease, you pay only for the time you use the equipment – unlike a purchase – where you pay for the full life of the equipment in advance.

Plus, there's no down payment with a lease and leasing is a 100% tax deductible business expense. Each payment also is made with pre-tax dollars. This allows you to shelter more of your funds during the lease term than you could with conventional financing or an outright purchase.

WHY DEALER LEASING?

We're an independent leasing broker specializing in leasing to companies located in this region. Since 1986, we've helped small and large companies obtain the equipment, hardware and software to help their companies grow. We offer 12 month to 60 month leases ranging from \$2,500 to literally hundreds of thousands of dollars.

YOU FIND THE EQUIPMENT, WE'LL PROVIDE THE MONEY.

Dealer Leasing provides flexible programs for virtually all types of equipment for manufacturers, restaurants, medicine, and general industry. We also offer car leasing for company executives and staff members.

From fork lifts and computers to Ferraris and tractor trailers, we can help you lease the equipment, computer systems and software you need.

WE'RE FLEXIBLE.

We'll work with you to establish the payments and terms that fit your budget. During the lease you may upgrade your equipment without incurring financial penalties accessed by many leasing companies.

At the end of your lease you may purchase the equipment at a low prearranged price, upgrade to newer equipment or simply return it without further obligation.

CALL US TODAY. LET US SHOW YOU HOW AFFORDABLE LEASING CAN BE.
